## A. Tugas 1.2 First Run Flutter

Lakukan instalasi dan konfigurasi Flutter di komputer Anda. Implementasi hingga aplikasi dapat berjalan pada device / emulator

### Langkah 1:

Install dan Setup JDK & ENV:

- Lakukan Instalasi via web browser lalu extract file nya setelah di download dan setup di system environment di device saya

- Untuk User Variable

| User variables for User  |                                                        |
|--------------------------|--------------------------------------------------------|
| Variable                 | Value                                                  |
| ChocolateyInstall        | C:\ProgramData\chocolatey                              |
| ChocolateyLastPathUpdate | 133682707905000843                                     |
| GOPATH                   | C:\Users\User\go                                       |
| IntelliJ IDEA            | C:\Program Files\JetBrains\IntelliJ IDEA 2024.2.3\bin; |
| JAVA_HOME                | C:\Java\jdk-21                                         |
| MAVEN_HOME               | C:\Program Files\apache-maven-3.9.11                   |
| OneDrive                 | C:\Users\User\OneDrive - Telkom University             |
| OneDriveCommercial       | C:\Users\User\OneDrive - Telkom University             |

- Untuk System Variable

| System variables     |                                                                   |
|----------------------|-------------------------------------------------------------------|
| Variable             | Value                                                             |
| DriverData           | C:\Windows\System32\Drivers\DriverData                            |
| EnableLog            | INFO                                                              |
| GIT_LFS_PATH         | C:\Program Files\Git LFS                                          |
| JAVA_HOME            | C:\Java\jdk-21                                                    |
| NUMBER_OF_PROCESSORS | 16                                                                |
| OS                   | Windows_NT                                                        |
| Path                 | C:\Program Files\Apache\Maven\bin;C:\Program Files\Git\bin;C:\... |
| PATHFEXT             | .COM;.EXE;.BAT;.CMD;.VBS;.VBE;.JS;.JSE;.WSF;.WSH;.MSC;.PY;.PYW    |

## Langkah 2:

### Instalasi Flutter SDK

- Download flutter nya dulu dari web browser, kemudian setelahnya extract dokumen yang telah di download tadi untuk melakukan setup dan langkah berikutnya

## Stable channel

Windows macOS Linux

Select from the following scrollable list:

| Flutter version | Architecture | Ref     | Release date | Dart version | Provenance                         |
|-----------------|--------------|---------|--------------|--------------|------------------------------------|
| 3.41.2          | x64          | 90673a4 | 2/20/2026    | 3.11.0       | <a href="#">Attestation bundle</a> |

- flutter sudah terinstall di device saya

```
Flutter Console
#####  ##      ##      ## #####  #####  #####  #####
##      ##      ##      ##      ##      ##      ##      ##
##      ##      ##      ##      ##      ##      ##      ##
#####  ##      ##      ##      ##      ##      #####  #####
##      ##      ##      ##      ##      ##      ##      ##
##      ##      ##      ##      ##      ##      ##      ##
##      #####  #####      ##      ##      #####  ##      ##

WELCOME to the Flutter Console.
=====

Use the console below this message to interact with the "flutter" command.
Run "flutter doctor" to check if your system is ready to run Flutter apps.
Run "flutter create <app_name>" to create a new Flutter project.

Run "flutter help" to see all available commands.

Want to use an IDE to interact with Flutter? https://flutter.dev/ide-setup/

Want to run the "flutter" command from any Command Prompt or PowerShell window?
Add Flutter to your PATH: https://flutter.dev/setup-windows/#update-your-path

=====

C:\Users\User>
```

- Masuk kembali ke system environment dan edit user variable nya untuk menambahkan konfigurasi dari flutternya

- Setelahnya seharusnya flutter sudah terintegrasi dengan command line (atau cmd) pada device saya yang bisa dilihat seperti ini

```
Microsoft Windows [Version 10.0.26300.7877]
(c) Microsoft Corporation. All rights reserved.

C:\Users\User>flutter
Building flutter tool...
Running pub upgrade...
Resolving dependencies... (3.0s)
Downloading packages... (14.9s)
Got dependencies.
Manage your Flutter app development.

Common commands:

  flutter create <output directory>
    Create a new Flutter project in the specified directory.

  flutter run [options]
    Run your Flutter application on an attached device or in an emulator.

Usage: flutter <command> [arguments]

Global options:
-h, --help                Print this usage information.
-v, --verbose              Noisy logging, including all shell commands executed.
                           If used with "--help", shows hidden options. If used with "flutter doctor", shows additional diagnostic information. (Use "--vv"
                           to force verbose logging in those cases.)
-d, --device-id            Target device id or name (prefixes allowed).
--version                 Reports the version of this tool.
--enable-analytics         Enable telemetry reporting each time a flutter or dart command runs.
--disable-analytics       Disable telemetry reporting each time a flutter or dart command runs, until it is re-enabled.
--suppress-analytics       Suppress analytics reporting for the current CLI invocation.

Available commands:
```

- Lalu ke langkah selanjutnya ketik flutter doctor di cmd untuk melihat integrasi aplikasinya dan yang harus di download juga untuk setup ke langkah berikutnya

```
Windows PowerShell

Install the latest PowerShell for new features and improvements! https://aka.ms/PSWindows

PS C:\Users\User> flutter doctor
Doctor summary (to see all details, run flutter doctor -v):
[✓] Flutter (Channel stable, 3.41.2, on Microsoft Windows [Version 10.0.26300.7877], locale en-ID)
[✓] Windows Version (11 Education Insider Preview 64-bit, 25H2, 2009)
[✗] Android toolchain - develop for Android devices
    ✗ Unable to locate Android SDK.
       Install Android Studio from: https://developer.android.com/studio/index.html
       On first launch it will assist you in installing the Android SDK.
       (or visit https://flutter.dev/to/windows for more instructions).
       If the Android SDK has been installed to a custom location, please use
       `flutter config --android-sdk` to update to that location.

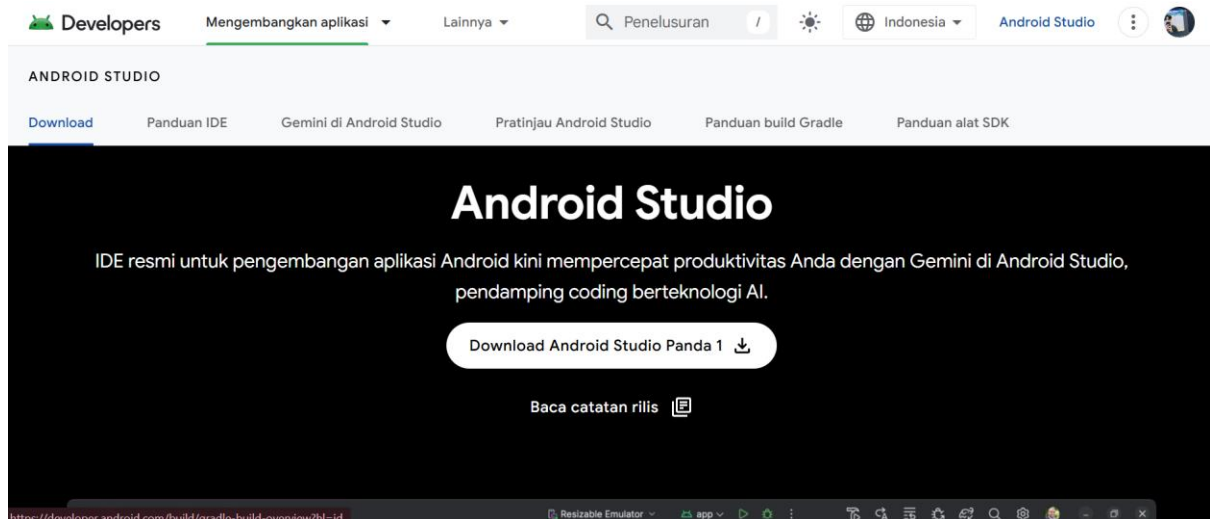

[✓] Chrome - develop for the web
[✗] Visual Studio - develop Windows apps
    ✗ Visual Studio not installed; this is necessary to develop Windows apps.
       Download at https://visualstudio.microsoft.com/downloads/.
       Please install the "Desktop development with C++" workload, including all of its default components
[✓] Connected device (3 available)
[✓] Network resources

PS C:\Users\User> |
```

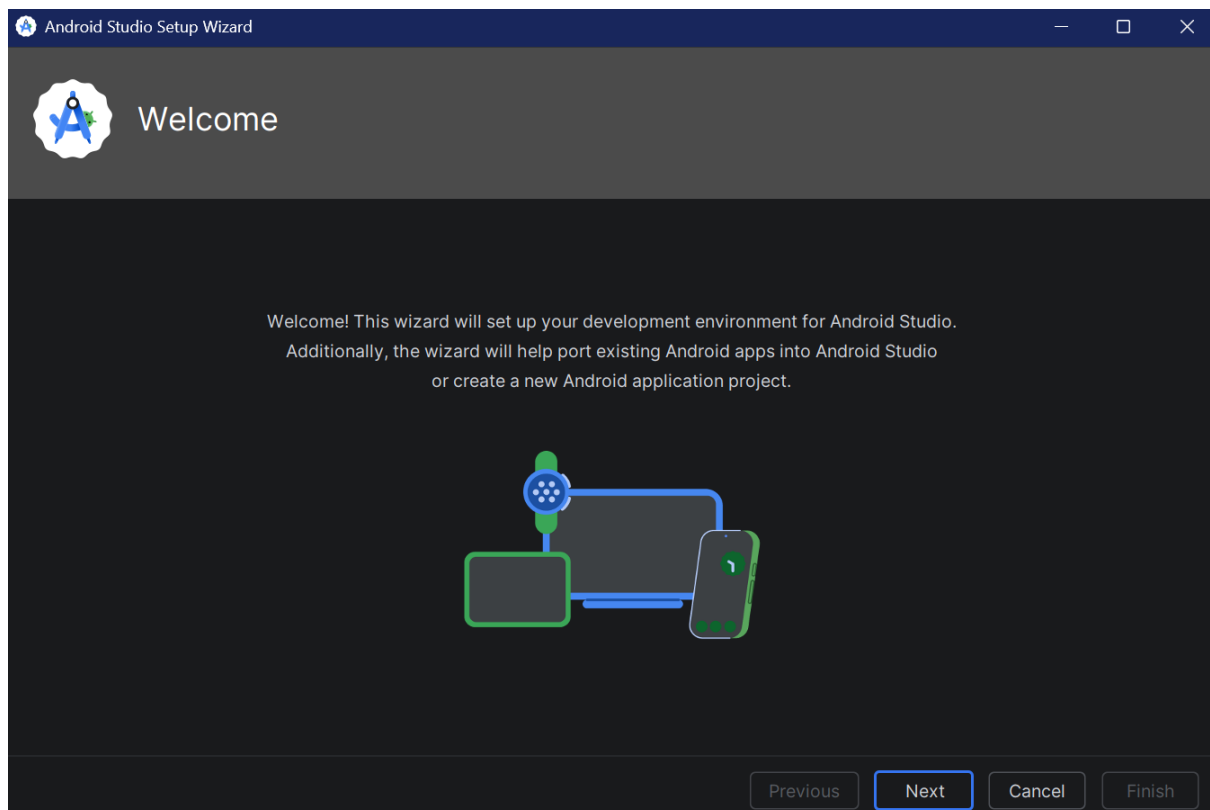

### Langkah 3:

#### Install Android Studio Dan SDK Managernya

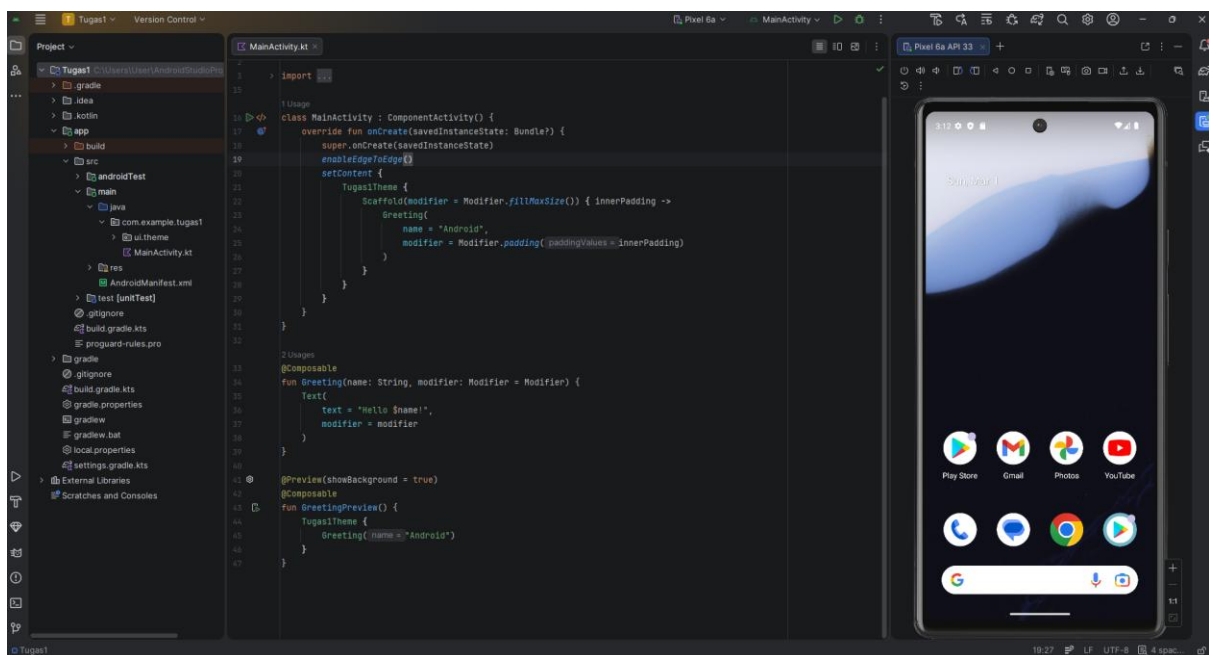

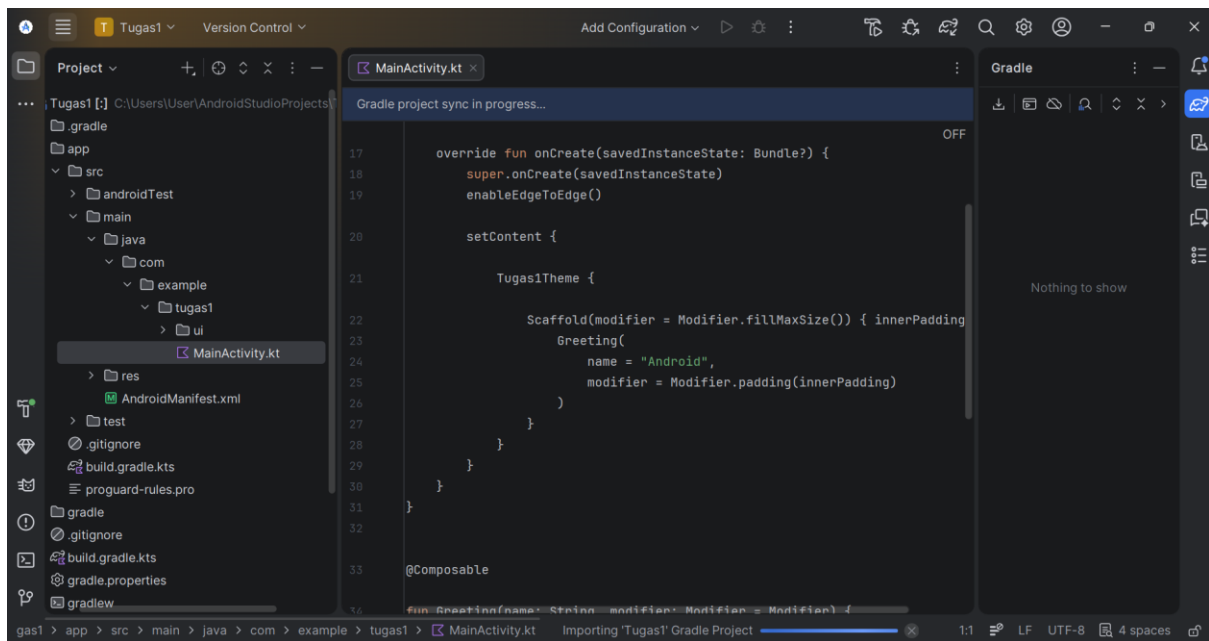

- Download dan install android studio nya via web kemudian setup untuk memulainya

- Tampilan ketika sudah selesai dan terpasang dengan baik di perangkat saya

## B. Contoh Implementasi Pada emulator:

- Kalau Versi dari Vscode tinggal install plugin dan extention nya saja
